## TECHNICAL SKILLS

- Javascript, HTML5, CSS3, ReactJs, NextJs, Tailwind, Material-UI, Antd
- Git, GitHub, BitBucket, Figma, Trello, Jira, Google Analytics and Google Tag manager.
- Windows, Mac, Ubuntu

## PROFESSIONAL EXPERIENCE

**Proactive For Her**                                                       **May 2022 - Oct 2022**
*Software Developer Engineer - 1*                                              *Bengaluru, India*

Proactive For Her offers judgment-free, personalized, and confidential healthcare for Indian women. Online, at home, and in-clinic services in Bengaluru.

Accomplishments:
- Worked on Diagnostics 2.0 UI components and handled the booking an appointment section by revamping the design. Closely involved in requirements discussions with the team (Next JS + Eslint to write clean code + SASS)
- Revamped the Blogs page with the new design increasing user interest and views in ReactJs, MaterialUI & Tailwind.
- Worked on Admin Panel modules which are based on React- Redux. Fixed the bugs identified during the test phase.
- Successfully accomplished the Integration of Google Tag Manager, where I have integrated Button clicks, Page Views, and E-commerce events with the help of custom and pre- defined events and passing data to Google Analytics.
- Discussed project progress with customers, collected feedback on different stages, and directly addressed concerns.

**Rayabhari Technologies**                                                 **March 2021 - Apr 2022**
*Software Engineer*                                                             *Bengaluru, India*

Rayabhari Technologies Pvt. Ltd. is a company that converts your ideas to software applications using trending technologies.

**Dentamitra - ReactJs Project**

Accomplishments:
- Trained in frontend technologies designing and developing the website using HTML5, CSS3, Javascript, and Reactjs.
- Designed UI components for responsiveness, form validations, templates, and services in ReactJs, Antd, CSS, and React Hooks.
- Working knowledge of version control systems using Git & Github. Familiar with Agile methodologies using Trello.
- Fixing bugs and testing for usability. Collected, defined and translated user requirements into project designs and implementation plans.

**Blue Ocean - NextJs Project**

Accomplishments:
- Used NextJS framework for developing user interface. Worked as UI developer to create UI components.
- Developing and maintaining the user interface. Developing and implementing highly responsive user interface components using react concepts.
- Accomplished form validations, dynamic routing, and integration with HTTP methods including UI design and responsiveness. Working knowledge of JSON/XML, and REST API for a Temple web app.
